## Technical Issues: How to Clear Cache on iPad (Browser & Salesforce App)

Browser:

1. Go to Settings → Select Browser (Sarfari, Chrome, Firefox, etc.)

2. Scroll down until you see *Clear History and Website Data* → Select *All History* → *Clear History*
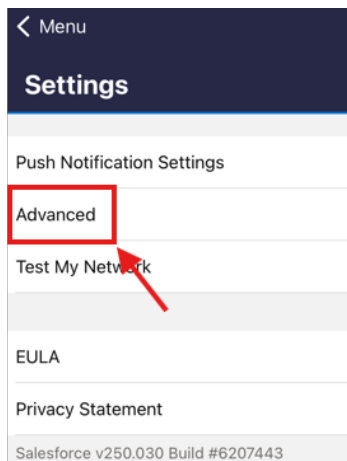

Salesforce App:

1. Select Smiley Face at upper left corner

2. Select *Settings → Advanced → Clear Cached Data*

PLEASE NOTE: There is no confirmation message when you select *Clear Cached Data*. A check mark will appear next to *Clear Cached Data* which indicates it's been cleared. Log out & log back in to Salesforce to apply changes.
